Atty Dkt. No.: CELL-017

USSN: 09/814,357

TECH CENTER 1600/2900
CERTIFICATE OF FACSIMILE

I hereby certify that this correspondence is transmitted by facsimile to the USPTO, (703) 308-4556, addressed to the Assistant Commissioner for Patents, Washington, DC 20231 on this date: August 14, 2002.

Typed or Printed Name	Susan M. Alessi		
Signature	<i>Susan M. Alessi</i>	Date	August 14, 2002
Supplemental Amendment Address to: Assistant Commissioner for Patents Washington, D.C. 20231	Attorney Docket	CELL-017	
	First Named Inventor	YU et al.	
	Application Number	09/814,357	
	Filing Date	March 21, 2001	
	Group Art Unit	1635	
	Examiner Name	Whiteman, Brian A.	
Title:		METHODS OF TREATING NEOPLASIA WITH COMBINATION OF TARGET CELL-SPECIFIC...	

Sir:

Prior to examination of the above captioned application, please make the following amendments.

IN THE CLAIMS

Please replace the pending claims with the claims below. Attached hereto is a marked-up version of the changes made to the specification and claims by the current amendment; captioned "VERSION WITH MARKINGS TO SHOW CHANGES MADE."

Cancel claims 1-58.

Add the following new claims:

~~59.~~ A method for suppressing tumor growth in an individual comprising: administering a target cell-specific adenovirus vector, said vector comprising an adenoviral early gene essential for replication under transcriptional control of a target cell-specific transcriptional regulatory element (TRE), selected from the group consisting of a prostate-specific antigen (PSA)-TRE, an α -fetoprotein (AFP)-TRE and a human uroplakin II (UPII)-TRE and at least one antineoplastic agent selected from the group consisting of paclitaxel, docetaxel, doxorubicin and cisplatin, wherein the amount of antineoplastic agent administered is less than that known in the art to be effective for suppressing tumor growth when administered alone

Atty Dkt. N. : CELL-017

USSN: 09/814,357

60. The method of claim 59, wherein said at least one antineoplastic agent is doxorubicin.

61. The method of claim 59, wherein said at least one antineoplastic agent is cisplatin.

54B
62. A method for suppressing tumor growth in an individual comprising: administering a target cell-specific adenovirus vector, said vector comprising an adenoviral gene essential for replication under transcriptional control of a prostate-specific antigen (PSA)-TRE and at least one antineoplastic agent selected from the group consisting of etoposide, estramustin and 5-fluorouracil (5-FU), wherein the amount of antineoplastic agent administered is less than that known in the art to be effective for suppressing tumor growth when administered alone.

63. The method of claim 59, wherein said at least one antineoplastic agent is selected from the group consisting of paclitaxel, docetaxel and etoposide.

64. The method of claim 59, wherein said at least one antineoplastic agent is 5-fluorouracil (5-FU).

65. The method of claim 59, wherein said at least one antineoplastic agent is doxorubicin or mitoxantrone.

66. The method of claim 59, wherein said at least one antineoplastic agent is estramustine or cisplatin.

67. A method for suppressing tumor growth in an individual comprising: administering a target cell-specific adenovirus vector, said vector comprising an adenoviral gene essential for replication under transcriptional control of an α -fetoprotein (AFP)-TRE and at least one antineoplastic agent selected from the group consisting of paclitaxel, docetaxel, doxorubicin, cisplatin, mitomycin C, and mitoxantrone, wherein the amount of antineoplastic agent administered is less than that known in the art to be effective for suppressing tumor growth when administered alone.

68. The method of claim 67, wherein said at least one antineoplastic agent is paclitaxel or docetaxel.

69. A method for suppressing tumor growth in an individual comprising: administering a target cell-specific adenovirus vector, said vector comprising an adenoviral gene essential for replication under transcriptional control of a human uroplakin II (UPII) transcriptional regulatory element

Atty Dkt. No.: CELL-017

USSN: 09/814,357

(TRE), and at least one antineoplastic agent selected from the group consisting of paclitaxel, docetaxel, doxorubicin and cisplatin, wherein the amount of antineoplastic agent administered is less than that known in the art to be effective for suppressing tumor growth when administered alone.

70. The method of claim 69, wherein said at least one antineoplastic agent is paclitaxel or docetaxel.

~~71. A method for suppressing tumor growth in an individual comprising: administering a target cell-specific adenovirus vector, said vector comprising an adenoviral gene essential for replication under transcriptional control of a prostate-specific antigen (PSA)-TRE or an α -fetoprotein (AFP)-TRE, together with mitoxantrone, wherein the amount of mitoxantrone administered is less than that known in the art to be effective for suppressing tumor growth when administered alone.~~

D 72. The method of claim 59, wherein the adenoviral early gene is E1A.

73. The method of claim 59, wherein the adenoviral early gene is E1B.

74. The method of claim 73, wherein E1B has a deletion of the 19-kDa region.

~~75. A method for suppressing tumor growth in an individual comprising: administering a target cell-specific adenovirus vector, said vector comprising an adenoviral gene essential for replication under transcriptional control of a target cell-specific transcriptional regulatory element (TRE), selected from the group consisting of a prostate-specific antigen (PSA)-TRE, an α -fetoprotein (AFP)-TRE and a human uroplakin II (UPII)-TRE and administering an effective amount of an appropriate course of external radiation therapy to the individual wherein the amount of radiation administered is less than that known in the art to be effective for suppressing tumor growth when administered alone.~~

SUB E

76. The method of claim 77, wherein said TRE is a prostate-specific antigen (PSA)-TRE.

REMARKS

Claims 1-58 are canceled, and new claims 59-76 added. The new claims clarify the subject matter of the invention, and find basis in the originally filed claim set. No new matter is added.

Applicants submit that all of the claims are now in condition for allowance, which action is requested. If the Examiner finds that a Telephone Conference would expedite the prosecution of this application, he is invited to telephone the undersigned at the number provided.
